of 208 m2 including terraces and a basement. The ground floor features a spacious and light-filled open-plan living area that seamlessly connects the kitchen, dining area, and living room. Large glass walls provide abundant natural light and direct access to the garden, creating a harmonious indoor-outdoor living experience.

The upper floor comprises two generous bedrooms, a walk-in wardrobe, and a large terrace overlooking the landscaped garden — an ideal space for relaxation and privacy. An additional 20 m2 basement offers flexible use as a gym, hobby room, wine cellar, or storage space.

Particular emphasis has been placed on energy efficiency and long-term sustainability, with the villa equipped with:

-Underfloor heating powered by a heat pump

-Solar power system for electricity production

-Solar system for domestic hot water

-High-quality joinery with double-glazed windows, providing excellent thermal and sound insulation

The outdoor area features a swimming pool with an electrolysis system, offering a more natural and healthier water treatment solution, alongside a covered summer kitchen with a fireplace, creating a private oasis for relaxation and entertaining during the warmer months.

This property is an outstanding opportunity for buyers seeking a high-quality home built with durability, comfort, and efficiency in mind. It is equally well-suited for luxury family living or as a secure high-end investment for the tourism market.
